

MICROSS™

FEATURE

We at MICROFIL INDIA PVT LTD take pleasure to inform you that our company has completed more than two decades in Filtration and Separation Technology catering to critical filtration need in manufacturing of Pharmaceutical, Biotech, coating Chemicals and Food Beverage.

MICROFIL have a advanced MICROSSTM as CROSSFLOW filtration system which is also known as tangential flow filtration. We understands the stress and focus that you place the quality of the product that you produce. MICROFIL is one of the best leading providers of Cross-Flow Technology in process industry and deliver the Cross-Flow system which is specially designed according to various process and customer requirement.

1. Continuous process
2. Tangential faster filtration process
3. Simple and efficient cleaning procedure
4. Advanced membrane technology
5. High filtrate recovery

Our partner is TAMI which is

- Main actors in filtration, separation & purification in industry
- Manufacturing and selling thousand square meter of ceramic membrane
- The TAMI Industries group has a deep knowledge of all aspects of liquid filtration.

APPLICATION

1. Clarification of various solution
2. Separation of biomass and Endotoxin
3. Recovery of catalyst
4. Filtration & fractionation of various milk and dairy product
5. Recycling of used CIP solution
6. Used in separation of plasma, antibiotics etc.
7. Clarification of alcoholic & nonalcoholic beverages like Wine, Beer, Juice etc.
8. And many more

System for Peptide Concentration

PILOT AND LAB FACILITY

1. Well Experience & trained employee
2. Well established MFC centre for trial
3. All utilities & resource is available
4. Lab & Pilot skid for all type of filtration trial
