

ADHESIVE FILTRATION

OBJECTIVE

1. Replace manual filters upgrade the filtration system.
2. Eliminate debris that cause surface and contact deformities - help quality, lower waste using self cleaning MICROFIL AUTOMATIC STRAINER(MAS).

PRODUCT DETAILS

— Adhesive is a synthetic polymer/Natural polymer that bonds together the molecules of unlike substances in surface contact.
 — Adhesives are made by chemical conversion, evaporation and by thermal conversion.

CONTAMINANTS

- Particle , sand, dirt and chunks etc.
- Foreign solids, Undissolved solids, gelatinous debris etc.
- Unmelted coating and mix debris, Wood particles etc.

STRATEGY ADOPTED

Adhesives are especially tough applications for filter to handle. Therefore MICROFIL provide MAS filter for trouble free operation.

RESULT

Using MICROFIL MAS system, adhesives contaminant get reduced acceptance limit.

CUSTOMER DELIGHT

1. Quality of adhesive is improved.
2. Optimum product recovery & overall cost is reduced.

FEATURE OF STRAINER

1. Wedge wire/ Slotted
2. Out to in flow
3. Easy backwash
4. High viscosity filtration
5. High temperature application
- 6.
